

ARWA's Water & Wastewater On-line Operator Certification Examination Preparatory Training Program

The Alabama Rural Water Association Water and Wastewater Operator Certification Examination Preparatory Training Program has been in place for nearly 50 years. During that time the ARWA has assisted hundreds of individuals in obtaining their State of Alabama water and/or wastewater operator certifications. The ARWA has been instrumental over the years in the development process of the Alabama Department of Environmental Management (ADEM) approved operator certification and continuing education hour program. The ARWA employs well-known, respectable instructors with several years of experience in the water and wastewater fields. These instructors bring with them knowledge of the technical and managerial aspects of the water and wastewater industry as well as being certified water and wastewater operators. Each instructor is supplied current and updated information regarding the course materials to be presented.

Individuals must attend 100% of each course for substitution of required experience credit purposes for operator certification. It is the responsibility of each individual attending an ARWA Water or Wastewater Operator Certification Exam Preparatory Training Course to comply with the ADEM Division 10 Regulations as they apply for certification examination and operator certification requirements. Course Manuals are sold by the ARWA separately from the class tuition fee. We strongly recommend that each student or Utility purchase the necessary manuals to help in the exam preparation process.

This will be a (Hybrid) Online/Onsite Water certification class. For students plan to attend in person the location is: Oneonta Utilities Board, 1607 2nd Ave. East, Oneonta AL 35121. Students who plan to attend online will need access to a computer with speakers and Internet (A microphone and webcam is recommended but not required. Handouts will be provided through the webinar for students to print out. Attendance will be tracked through the webinar software. The instructor will be available outside of the webinar hours to answer questions as well.

The tuition Fee for the course below follows:
