Job Title: Water System Manager Job

Type: Full Time

Salary: Based on Experience

Description:

The successful candidate will work with the Board of Directors to provide a safe, dependable water supply to the customers of Holtville Water System. The candidate will perform tasks necessary to operate and maintain a potable water system and direct the staff of the system.

Knowledge Skills and abilities:

- Thorough knowledge of federal, state, and local laws, regulations, governing the operations of a community water system.
- A good working knowledge of the principles and practices of a water utility administration, planning and organization.
- A good working knowledge of all water system components and how to safely maintain and repair all diverse types of sizes of infrastructure.
- Familiar with Federal and State Safe Drinking Water Act requirements.
- Ability to assess situations critically, solve problems, and work under stress.
- Ability to establish and maintain effective working relationships with the Board of Directors, employees, customers, contractors, other utilities and ADEM.
- Skill and knowledge including computer and related software and the ability to master modern technologies.
- Skill in analyzing data, preparing accurate reports, and formulating policy and service recommendations. Must have working knowledge of SCADA.

Special Requirements:

- Ability to work outside when needed in all weather conditions. Available for on call work after hours and weekends as needed.
- Certification at Distribution Grade I or higher by the State of Alabama and the ability to obtain Distribution Grade I or above in a timely manner.
- State of Alabama Class A CDL.
- Ability to proficiently operate backhoe and other industry equipment.
- Live in the Holtville Water systems Inc. area or can relocate to the Holtville area within 6 – 12 months of hire.
